

REMARKS

Claim 1 has been amended to define the invention over the applied art. The art has a total number of available cameras but fails to teach providing a number of available identifications is twice or more than the total number of available the cameras.

Additionally, claim 1 has been amended to define the number of proper bits to be in number to the number of auxiliary bits. We note that the Board held that original claim 1 did not make this distinction.

The Board also indicated that the number of auxiliary bits was not limited in number to the same number of proper bits. Claim 1 has been amended to define this limitation.

Accordingly, it is believed claim 1 now distinguishes the invention over the art of record.

The examiner is respectfully requested to reconsider the application, withdraw the objections and/or rejections and pass the application to issue in view of the above amendments and/or remarks.

Respectfully submitted,

Robert E. Bushnell
Attorney for Applicant
